

Davis Northrop selling spare C4 parts

David has a 1987 with manual 4+3 transmission. It has 133K miles on it but everything works, including all the digital dash. He is removing just about everything and if anyone needs parts for their C4 this may work for them. Some parts obviously are different between the years but the 84-87 are very similar, except the intake system change in 85. As far as the drivetrain, he is selling the 4+3 transmission complete but keeping the engine and differential for now. There will be parts available off the engine later this year but he is not sure exactly what yet but definitely any accessories or smog equipment, headlights too. The interior is fair but everything is there and not trashed, just worn. He will be removing the digital dash and replacing it with all analog. The suspension will be coming apart and mostly, if not all, replaced. He has both roofs (and he can't decide which to keep yet) and he will likely won't be selling off any body parts (yet) except maybe the hood and the inner bumper parts. If anyone needs something they can email me at djnorthrop@sbcglobal.net or call him at 925-250-0458 to get pictures or see if something is available and when. He has a ton of pictures and can take more if needed (actually he will be documenting as much as he can). He will start stripping the car the week of 9/12.
